10884. San Diego County Skywarn folks on standby, NOT Activated yet...

San Diego County Skywarn is on standby but NOT Activated yet. Concerns will be thunderstorms with gusty winds, smail hail, brief heavy rain, and localized flooding. Waterspouts may be possible over coastal waters. Also snow levels may drop down to 3000 feet. Mountain travel will likely be affected.

The NWS would like us to report things like ANY hail, and ANY snow this time. Please use either the online reporting tool at http://www.swskywarn.org/ReportWeather.php or if it's something like a waterspout call the NWS 800 spotter number.

If we do indeed activate, you will be notified again just as you were this time. At that time, look for us on the ECRA Palomar repeater, 147.030,+,103.5.

Can you tell me how Riverside County spotters get activated? I can't hear

Don't feel bad, I can't hear the Palomar repeater from San Diego County. Here in SD, we use email notifications as a backup. If I see anything, I will forward the email to you. Not sure what areas will be activated, but I imagine you guys have more snow and ice than you need by now, Sun is trying to break through in SD County, but the rain and snow has already fallen during the night. My friend had to do some serious scraping to leave for work from Cuyamaca this morning!

Hi Dave,
   I'm not sure of the current Skywarn activation procedures for Riverside County. Ed, K6ERS, edsherman(at) wxobs.org, might be able to tell us, though. Replace " (at) " with "@" for Ed's email address; we do that so spambots are less likely to find email addresses here.

Jim - My satellite radio has been predicting thunderstorms all week - sure would be a nice break in the weather, but the rain just stopped in Dulzura, the sun is out and the clouds are receding.

Between midnight and 7 a.m., 1.50" of rain fell on my little rain gauge.
At about 3:30 a.m. the entire yard was under water from streetflooding.
The good news is: my plants are happy!

Hey gang, now that it is Spring, Field Day will be here before you know it! There was some discussion about Skywarn making a public appearance for field day. Is anyone up for it? Jim, did you want to take the reins on this project and find a location and a bunch of Skywarn folks to show up? I've been talking to some people that have been long time spotters but have not been too active and want to become more involved. This would be a good chance for them! Also, should we make up a list of equipment we will need and ask Jerry how to go about getting it set aside for the event? I have some tripod stands and some batteries I could bring, and might be able to supply some other stuff.

I think I'd ask Eric if he'd like to head this up this year. I have already committed to another group, but if that fizzles then I'll show up at whatever Eric arranges.

You're right, it shouldn't be about points. Furtunately, we are not a club, so we don't need to be competitive. I would like to do this mainly for exposure. I'm pretty sure that there are more people in San Diego County that don't know about Skywarn than those that do! For thisw reason, I would suggest a location that has a lot of foot traffic. A San Diego mall comes to mind, but there are so many malls, if we set up in one, we will be ignored by the others. Home Depot is another idea. Where is there a place that no matter where somebody is shopping that day, or what their daily activities are, they always end up at this one place to do something? We could do it at NWS offices, but nobody would find us there. We could do it in a smaller community, but then we are limited to the population of that community.

Let's throw up as many ideas as possible and then we can begin to narrow it down.

Field Day will be one of the topics on our upcoming Skywarn staff meeting at the NWS. Meeting time&date for the meeting TBD. We should attempt a phone link during the meeting with all regional coordinators if possible, maybe using either Skype or Google+ Hamgout. Audio only is OK and requires less bandwidth.

I bought a new Diamond X510 antenna (with a lot of gain) and a 150 watt 2-meter amp, and I was FINALLY able to check into the Tuesday net on the ECRA Palomar repeater. Some other benefits I got were access to Winlink gateways and packet digipeaters that I could not hit before, better simplex communications, and now I can also hit the Mt.Laguna repeater, which was previously out of reach. I have been trying over a year, and finally won the battle for signal strength!

...RED FLAG WARNING NOW IN EFFECT FROM 5 AM THURSDAY UNTIL 5 PM PDT FRIDAY FOR GUSTY NORTHEAST WINDS AND VERY LOW RELATIVE HUMIDITY FOR THE VENTURA COUNTY COAST AND PORTIONS OF THE LOS ANGELES COUNTY COAST...

.A STRONG SANTA ANA WIND EVENT IS EXPECTED TO DEVELOP BY TONIGHT AS SURFACE HIGH PRESSURE DEVELOPS OVER NEVADA. GUSTY NORTHEAST WINDS HAD ALREADY SURFACED IN THE MOUNTAINS AND SANTA CLARITA VALLEY AS OF WEDNESDAY AFTERNOON. ALTHOUGH A DEEP MARINE LAYER WAS SLOWING THE ADVANCE OF THESE WINDS...ITS EXPECTED THAT THE SANTA ANA WINDS WILL PUSH SOUTH AND SOUTHWEST THROUGH MOST OF THE REST OF VENTURA AND LOS ANGELES COUNTIES BY TONIGHT AND EARLY THURSDAY.

GUSTS BETWEEN 40 AND 50 MPH ARE POSSIBLE AS FAR WEST AS THE VENTURA COUNTY COAST AND THE MALIBU COASTLINE EAST TO THE HOLLYWOOD HILLS. THE COMBINATION OF THESE GUSTY WINDS...HUMIDITIES DROPPING TO 5 PERCENT OR LESS ACROSS A LARGE PORTION OF VENTURA AND LOS ANGELES COUNTIES...AND FUELS THAT ARE MORE TYPICAL OF MID TO LATE SUMMER...WILL CREATE AN EXTREMELY HIGH FIRE DANGER. WINDS ARE EXPECTED TO DECREASE LATE THURSDAY AFTERNOON AND EVENING BUT REMAIN GUSTY AT TIMES THROUGH AT LEAST FRIDAY MORNING. DESPITE THE DECREASE IN WIND SPEEDS...THE RED FLAG WARNING HAS BEEN EXTENDED THROUGH FRIDAY AFTERNOON SINCE HUMIDITIES ARE EXPECTED TO REMAIN EXTREMELY LOW WITH LITTLE OR NO OVERNIGHT RECOVERIES AND DAYTIME TEMPERATURES RANGING FROM 90 TO 100 DEGREES.

352 PM PDT THU MAY 9 2013

THE NATIONAL WEATHER SERVICE IN SAN DIEGO HAS ISSUED AN

* URBAN AND SMALL STREAM FLOOD ADVISORY FOR RAPID RISES IN NORMALLY
DRY WASHES IN...
SOUTH CENTRAL RIVERSIDE COUNTY IN SOUTHERN CALIFORNIA...
NORTHEASTERN SAN DIEGO COUNTY IN SOUTHWEST CALIFORNIA...

* UNTIL 645 PM PDT

* AT 344 PM PDT DOPPLER RADAR INDICATED A THUNDERSTORM PRODUCING
HEAVY RAINFALL...OVER THREE FOURTHS OF AN INCH IN LESS THAN AN HOUR
IN THE VICINITY OF SANTA ROSA MOUNTAIN. THIS THUNDERSTORM WAS MOVING
TOWARDS THE SOUTH AT 10 MPH.

THE RUNOFF FROM THIS HEAVY RAIN WILL DRAIN TO THE EAST AND SOUTHEAST
AND MAY IMPACT HIGHWAY 86 SOUTH OF 66TH AVENUE IN THE TORRES
MARTINEZ INDIAN RESERVATION...AND HIGHWAY S22 EAST OF BORREGO
SPRINGS.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

ADDITIONAL RAINFALL AMOUNTS OF A HALF INCH ARE POSSIBLE IN THE
WARNED AREA.

A FLOOD ADVISORY MEANS RIVER OR STREAM FLOWS ARE ELEVATED OR PONDING
OF WATER IN URBAN OR OTHER AREAS IS OCCURRING OR IS IMMINENT.

LOCAL AND DISTANT HEAVY RAINFALL WILL CAUSE RISES IN NORMALLY DRY
STREAMS...RIVERS...OR WASHES. IT IS IMPORTANT TO KNOW WHERE YOU ARE
LOCATED RELATIVE TO THESE AREAS. CAMPERS AND HIKERS SHOULD AVOID
THESE AREAS AND BE PREPARED TO MOVE QUICKLY TO HIGHER GROUND IF RAIN
THREATENS YOUR LOCATION OR UPSTREAM FROM YOUR LOCATION.

BOTH LOCALIZED AND DISTANT HEAVY RAINFALL WILL CREATE RISES IN WASHES
AND OVER LOW WATER CROSSINGS. WATER IN THE WASHES MAY TRAVEL MANY
MILES AND TAKE HOURS TO REACH YOUR LOCATION FROM UPSTREAM RAIN AREAS.
THIS COULD LEAD TO RISING WATER AND MINOR FLOODING WITHOUT RAIN
CURRENTLY FALLING AT YOUR LOCATION.

SW CA Skywarn is pleased to announce a combined ARRL Field Day station with Valley Center Fire Protection District CERT. We will operate 11AM June 22 - 11AM June 23 at Fire Station #72, which is at 28234 Lilac Road, Valley Center, CA. 92082.

Thing is, we have to park next door at the Community Hall, which is just to the west, at 28246 Lilac Road. It's maybe a 90 seconds walk from that parking lot to the Field Day station next door at the Fire Station. Disabled parking IS available at the Fire Station.

We hope to have 2 HF and 1 VHF/UHF station running, on 12V car/cart/marine batteries - no AC "mains" and hopefully no generators.

This is for training newbies this year, not for high scores.

* AT 931 AM PDT...NATIONAL WEATHER SERVICE DOPPLER RADAR INDICATED
SLOW MOVING THUNDERSTORMS PRODUCING HEAVY RAINFALL THAT WILL
LIKELY PRODUCE FLASH FLOODING IN THE EXTREME LOWER PART OF THE
COACHELLA VALLEY NEAR THE SALTON SEA.

* LOCATIONS IN THE WARNING INCLUDE BUT ARE NOT LIMITED TO MECCA.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

EXCESSIVE RUNOFF FROM HEAVY RAINFALL WILL CAUSE FLOODING OF SMALL
CREEKS AND STREAMS...COUNTRY ROADS...AS WELL AS FARMLAND ALONG THE
BANKS OF CREEKS AND STREAMS.

MOST FLOOD DEATHS OCCUR IN AUTOMOBILES. NEVER DRIVE YOUR VEHICLE INTO
AREAS WHERE THE WATER COVERS THE ROADWAY. FLOOD WATERS ARE USUALLY
DEEPER THAN THEY APPEAR. JUST ONE FOOT OF FLOWING WATER IS POWERFUL
ENOUGH TO SWEEP VEHICLES OFF THE ROAD. WHEN ENCOUNTERING FLOODED
ROADS MAKE THE SMART CHOICE...TURN AROUND...DONT DROWN.

Hi Ed,
   the NWS might like to see a copy of your report at http://www.srh.noaa.gov/StormReport/SubmitReport.php?site=sgx . This is the stuff they like to hear about.

Latest word is Skywarn is not likely to be activated today, unless things pick up a lot more...

PRECAUTIONARY/PREPAREDNESS ACTIONS...

EXCESSIVE RUNOFF FROM HEAVY RAINFALL WILL CAUSE FLOODING OF SMALL
CREEKS AND STREAMS...HIGHWAYS AND UNDERPASSES. ADDITIONALLY...COUNTRY
ROADS AND FARMLANDS ALONG THE BANKS OF CREEKS...STREAMS AND OTHER LOW
LYING AREAS ARE SUBJECT TO FLOODING.

MOST FLOOD DEATHS OCCUR IN AUTOMOBILES. NEVER DRIVE YOUR VEHICLE INTO
AREAS WHERE THE WATER COVERS THE ROADWAY. FLOOD WATERS ARE USUALLY
DEEPER THAN THEY APPEAR. JUST ONE FOOT OF FLOWING WATER IS POWERFUL
ENOUGH TO SWEEP VEHICLES OFF THE ROAD. WHEN ENCOUNTERING FLOODED
ROADS MAKE THE SMART CHOICE...TURN AROUND...DONT DROWN.

I'm Bob Younger. New to the SKYWARN group. Thanks for letting me join you.

Live in Wildcat Canyon, a couple miles south of the Casino up on the west side. My callsign is KK6FXV. Technician class. I have a quad-band HT (Yaesu VX-8DR). Also a currently uninstalled 144 MHz mobile (gotta figure out where to put that in the new car). I have generators (portable and not-so-portable), inverters, camping gear, 4WD, and could operate for a substantial period without outside utilities.

Looking forward to doing what I can to help.

Thanks again,
Bob

Can anybody weigh in on good weather stations? I am ready to junk my Oregon Scientific WMR200 and would like real world recommendations from some of you who are using other systems. I've heard good things about the Davis instruments, but would really like to hear from those of you who are using it.

Thanks

Ernie,

I replaced my OS station with a Davis Vantage Vue about three years ago and could not be more happy. My accuracy is considerably better and their customer service is great

Give me a call.

I have the Vantage Pro 2. I started with 6152 and later added the aspirated fan making it a 6153. The current costs are on the web site noted below. The price has come down significantly since my purchase. The battery needs to be replaced at least once a year. I change mine every 6 months on gp. The fan is supposed to be replaced annually according to the book. I just replaced mine for the first time. After 6 years, my ISS, remote transmitter started eating batteries, and had to be replaced, total cost with the new replacement fan $150. Turnaround on parts was less than one week. The unit is being operated in the desert in extreme heat conditions.

I verify the temp and humidity periodically with a sling psychrometer and get very good agreement.

Someone there has a sense of humor. During heavy rain the message “raining cats and dogs” comes up on the consol.

I have had a Davis VP2 for several years with no problems in Wrightwood and the high desert. Only issue was some rodents chewing through the cable that connects the anemometer to the transmitter. I think it's worth the investment.

Mine is wireless and has the 24 hour fan aspirated radiation shield. I installed a home-brew snow melter into the rain bucket and it works great. It consists of a couple light bulbs inside that heat up the bucket.

For those who thought California was having a slow winter, here is some of the activity from up north.
These were taken yesterday afternoon in Glenn County, in the northern Sacramento Valley.

1) Tornado near Willows, CA. The funnel was spotted at 5:03 p.m. west of Interstate 5, about 6
miles north of Willows, moving southeast at 5 to 10 mph. Significant
amounts of hail also were reported at the time.

2) Backlit funnel near Roseville.Twelve houses in west Roseville suffered damage when a possible tornado
touched down Wednesday evening.

12034. Skywarn Recognition Day Dec 4-5, 2015 4PM-4PM

Yahoo group: SW_SKYWARN (2012 — 2016)
Date: 2015-11-28 23:25:41 UTC
From: wb6zpb@...
Topic: 12034 Message: 12034

The NWS and SWSkywarn will once again participate in Skywarn Recognition Day by operating the ham radio station located at the NWS office at 11440 W. Bernardo Court, Suite 230, San Diego, California 92127.

We plan on operation from 4PM Friday, Dec 4 until 4PM Saturday, Dec 5. We need operators of all kinds, radio and log entries, etc. Team up with someone, swap roles from time to time, and all that. We'll be operating HF, VHF, and UHF.

Please contact Jim at wb6zpb@yahoo.com https://us-mg4.mail.yahoo.com/compose?to=wb6zpb@yahoo.com to reserve a time slots(s) for the event. Please indicate your most preferred time(s), followed by a secondary choice. We'll do our best to arrange operators in a sensible manner, but of course can't promise anything.

There is talk of a BBQ in the parking lot afterward, starting at 4PM or so. Think burgers and hot dogs, maybe some other stuff. The BBQ likelyhood depends on how many people express an interest. Please indicate if you'd like to attend the BBQ.

Jim WB6ZPB
